The Alcatel WebTouch™ One offers consumers an extraordinarily simple and attractive way to use the Internet. It also provides telecommunications companies with a unique opportunity to package Internet and phone services in a single device – an excellent means for attracting customers and boosting revenue. Discover what the Alcatel WebTouch™ One can do for you today.

**A WebTouch™ One for every home**  
Alcatel's award-winning WebTouch™ One is designed to bring the Internet into everyone's home. It makes Internet access easier, quicker and more practical than ever before. It also works as an all-purpose, hi-performance phone. And its compact, attractive design makes it fit perfectly into home surroundings.

The ultimate communication appliance at home.

**Easy to use.**

With Alcatel's WebTouch™ One, getting on the Internet is as easy as making a phone call.

- Installation simply requires plugging it in to an electrical socket and phone line.
- Its color touchscreen allows users to access all functions at the touch of a fingertip.
- A practical, retractable keyboard makes it easy to use while standing, sitting or even lying down.

**Compact.** Ideal for the home, the Alcatel WebTouch™ One's compact, attractive design blends well into all surroundings: kitchen, living room, bedroom, etc.

**Immediate.** Most Internet transactions involve quick consultation of practical services such as sending and receiving e-mail or finding practical information. With the Alcatel WebTouch™ One, users are immediately connected.

Internet & phone service package: a unique opportunity for operators.

The all-in-one Alcatel WebTouch™ One is an attractive, revenue-boosting tool for telecom companies: effective advertising and e-commerce medium, easy Internet access for increased use of services, new sources of revenue via combined offers and bundle services, phone operators control the gateway to e-services.

• **Experienced Internet users** will enjoy Alcatel's WebTouch™ One for its practicality and timesaving features: immediate Internet access, connections to preferred web sites, advanced Java Internet browser, etc.

• **First time users** will be attracted by its ease of use, allowing them to benefit from exciting Internet services without the hassles of a computer.

**Global offer.**

Alcatel Value Added Services is a server-based software platform that provides a range of functions with services for WebTouch™ One users. It also ensures administrative and operations capabilities for services operators.

The first Java based Internet device.

The Alcatel WebTouch™ One open architecture supports all Internet standard protocols. This reduces cost of ownership, improves flexibility and accelerates market penetration. It will also simplify future evolutions.

Internet Screenphone Reference Forum.

Alcatel, as a leading world supplier of telecommunications systems is member of the Internet Screenphone Reference Forum (ISRF). The Alcatel WebTouch™ One sets the standards for reliable, top-quality mass-market Internet terminals. Support service is available worldwide.
